Part III DETAILED ACTION

1. Claims 4-9, 12-23 and 27-29 are pending.

2. Applicant has elected species Bird, with traverse. in response the species election mailed 4-8-03. However since Applicant has provided no arguments traversing said species election the election has been treated as an election without traverse.

Furthermore, Applicant has amended claim 4 to recite a linking claim with a Markush grouping within it. However, it is no a proper a proper Markush group as the species recited within the grouping are not structurally related. As such the invention drawn to administering polynucleotides is considered withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to non-elected inventions. Further, claims 7-8 are considered withdrawn as being drawn to non-elected species.

Lastly, upon a search of birds, the elected species no prior art documents were found, an extension of the species to rabbits was done. It is noted claims 5, 22 and 29 are objected to as containing non-elected species and claim 6 is objected to as being dependent upon a rejected claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 4, 9, 12-19, 21, 23, 27-28 are rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. Patent No. 5,637,300 and/or

5,348,866. (IDS references).

The `300 and `866 patents teach preventing fertilization in rabbits by administering either a naturally occurring recombinant porcine zona pellucida protein conjugated to a dually functional carrier (the `866 patent) or a rabbit zona pellucida protein that is glycosylated and administered either alone or with either Freund's adjuvant or aluminum hydroxide.

4. Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term companion bird has no antecedent basis in claim 18, 17 or 1,
